

DR.DOK

Scan Directly To The Excel!

Single solution to ensure an efficient and error-free scanning and processing of images, documents, pdf files, etc. from structured and unstructured forms of multiple sizes, lengths and shapes.

This solution is capable of extracting information and digitizing any multilingual document – printed texts, handwritten texts, hand marked symbols and user electronic signatures via OCR, ICR, OMR and CV technologies.

1. Template based document digitization (E.g. Passport, KYC Forms, Driving License etc.)
2. Non-Template based document digitization (E.g. Salary Slips, Invoices etc.)

BENEFITS

1. Increase efficiency
2. Reduce cost
3. Reduce long term storage

4 STEP PROCESS

1. Tell DrDok, what are the document templates and the data fields that need to be captured.
2. Upload the document to be digitized.
3. Super quick data scanning and extraction.
4. Put the extracted information into Excel, a Database or integrate with any other system.
